

It has come to my attention that you, the FCC, has introduced a new broadcast service known as Low Power FM (LPFM). While these LPFM stations have been in existence for several years, you are now proposing to expand this service in a way that would allow these new LPFM stations to take priority over current FM translator service. K-LOVE that is often heard on FM translators could be forced off the air if the proposed rule changes are enacted and LPFM is given a priority over FM translator service, perhaps leaving my community without the K-LOVE signal.

K-LOVE is a positive alternative to the local stations of this community. There is always positive and uplifting commentary and music flowing through the airways. As a resident of this community, I have a station that I can tune into and know it will be an encouragement to my day every day. If K-LOVE is displaced by an LPFM broadcaster the effect on our local community will be harmful because this LPFM might provide other programming that is not family friendly and has a positive and encouraging impact on our community. Our area has a station because members of this community believe in the Message that is transmitted from K-LOVE. If this were not the case then we would not have a station here since it is listener supported. I believe the service provided by K-LOVE is vital to the public interest of this community. As long as K-LOVE is on the air in this community, residents who scan through the radio dial will have the opportunity to hear the most important information ever, the Good News!

Thank you for your time and consideration.

Sincerely,

Shannon Silhan

A faithful listener and supporter of K-LOVE
